

PROFESSIONAL SUMMARY

Technical student proficient in Python, Docker, and API testing, focused on developing AI-driven test automation and intelligent quality engineering platforms.

EDUCATION

B.Tech in Information Science & Engineering NMAM Institute of Technology, Nitte, Udupi	Aug 2023 – Aug 2027 GPA: 7.84
Class XII (CBSE) St. Karen's Secondary School, Patna, Bihar	Apr 2023 GPA: 82%
Class X (CBSE) St. Karen's School, Patna, Bihar	Apr 2021 GPA: 88%

SKILLS

Backend Tools	Python, Pydantic, Docker, Firebase, Supabase, DBMS
Testing API	API Testing, Postman, GitHub
Languages	C++, Dart, HTML/CSS
Soft Skills	Problem Solving, Communication, Leadership, Teamwork, Decision Making

PROJECTS

- Nexus Search | AI Search Platform | [Nishanttxx/Nexus-Searchh](#)
 - Engineered a dynamic AI search engine utilizing the **Gemini API** and **Flutter**, implementing advanced **Prompt Engineering** to optimize the accuracy and reliability of **LLM** responses.
 - Developed an interactive querying interface to handle real-time user interactions, focusing on the seamless integration of **Generative AI** components into a high-performance **React** frontend.
- AI Voice Digest | AI Content Summarizer | [Nishanttxx/Voice-Digest](#)
 - Architected an AI-powered summarization tool using **Flutter**, integrating real-time transcription and **API orchestration** for automated content processing and data synchronization.
 - Implemented intelligent summarization logic to transform unstructured voice data into concise digests, demonstrating capabilities in **AI-driven data optimization** and **NLP** pipelines.
- GST Billing | Invoice Automation Suite | [Nishanttxx/Gst_billing](#)
 - Developed a cross-platform invoicing suite using **Flutter** and **Dart**, implementing an automated tax engine to calculate **CGST**, **SGST**, and **IGST** in real-time for diverse clients.
 - Engineered a **GSTR-1** reporting system that automates the generation of tax-compliant **CSV/Excel** files, reducing manual data entry and increasing filing efficiency for businesses.
 - Integrated **Supabase** as a **Cloud** backend for real-time synchronization of business profiles and inventory, utilizing **Riverpod** for reactive state management and global data caching.

EXPERIENCE

- AI/ML Intern | 3skill | RemoteJul 2026 Present
 - Engineered a predictive ML model for quality classification using **Logistic Regression**, **KNN**, and **Decision Tree**, optimizing hyperparameters via **GridSearchCV** to boost accuracy.
 - Developed an AI-based hiring prediction system to automate decision-making by analyzing candidate skills and experience, demonstrating the ability to build data-driven models for **automated analysis**
- Member | Finite Loop Club-NMAMITAug 2024 – Aug 2025
 - Collaborated with a technical community to research emerging technologies and software development practices, establishing a foundation for designing **intelligent systems** and **automation tools**
 - Applied software engineering principles to solve complex problems through peer-led projects, focusing on the development of scalable solutions and **collaborative technical design** patterns.

EXTRA-CURRICULAR ACTIVITIES & ACHIEVEMENTS

- Maintained active membership in the Computer Society of India (CSI) to stay current with emerging computing trends, professional standards, and industry-best software practices.
